### Information about the service

#### What is the service?

CWNet's Aussie Broadband's nbn® broadband service uses NBNCo fixed wireless infrastructure to deliver broadband to your premises. This service can perform to a maximum download and upload speeds in the table, but these speeds can be affected by a range of factors including line of sight to the tower, nbn® cell congestion and nbn® backhaul congestion.

We will let you know after connection if nbn® has reported congestion on your cell, and whether nbn® has provided us with a forecast date for a fix.

#### Where is it available?

Fixed Wireless Plus is available anywhere that is covered by nbn's® fixed wireless broadband service.

90% of Fixed Wireless footprint for Homefast and 80% of Fixed Wireless footprint for Superfast under nbn®'s Fixed Wireless Upgrade program.

#### What do I need to access the service?

- nbn® will need to install (no cost) an antenna on your premises with internal wall cabling and a device inside your premises, next to a power point. A person over 18 will need to be at home for this appointment.

- You will also need an NBN-ready modem/ router (see "Equipment fees" on next page)

#### Speeds

The actual speed of your internet service is dependent on several factors including:

- The type of NBN technology available
- Customer premise equipment such as your modem/router
- Internal cabling
- Network congestion
- Speed plan chosen

#### What is included?

Features of this service include:

- Australian-based phone support
- Unlimited data on all plans
